

Quick Win Solutions Business Intelligence

A Complete Web-based BI Portal using Oracle 9iAS Technology

Oracle9iAS Portal, a key component of Oracle9i, leverages the security, reliability, and scalability of Oracle9i Application Server and the Oracle database. Together with Oracle Discoverer 9iAS and Oracle Reports 9iAS, organisations can quickly deploy a robust and feature-rich web desktop that is scalable, easy to manage, and is based around the internet standard, J2EE.

A Scaleable, Manageable System for Web-Based Reporting

Oracle9iAS Portal is a web-based application for building and deploying e-business portals. It provides a secure, manageable environment for accessing and interacting with enterprise software services and information resources.

Oracle9iAS Discoverer, Oracle's award winning product, enables report builders and analysts to create, modify, and execute ad hoc queries and reports. More casual users can view and navigate through pre-defined reports and graphs. Discoverer provides a business view to hide the complexity of the underlying data structure. It enables users to focus on solving business problems instead of data access issues. Oracle9i Reports is Oracle's award winning, high fidelity enterprise reporting tool. It enables organisations to give immediate access to information to all levels within and outside of the organisation in an unrivalled scalable and secure environment.

The Quick-Win Solution

This solution is suited to those organisations that have an existing data mart, data warehouse or reporting database built on an Oracle database, and wish to quickly deploy this information out to users over the web. The solution delivers a basic web portal, with limited customisation to the organisations requirements, together with an Oracle Discoverer workbook and an Oracle Reports report, both delivered as portlets. **plus consultancy's** approach reduces risks and lowers costs by tightly controlling the scope of the initial implementation, focusing on the delivery of early business benefit.

Key Benefits

- ➔ Provide access to business intelligence through a single source.
- ➔ Web-based with no client software needed.
- ➔ Uses scalable, enterprise-quality Oracle 9i and Oracle 9iAS technology.
- ➔ Transfer key skills to your organisation.

Achieve Results In One Month

Implementation of the base solution by **plus consultancy** is fast;

- ➔ Typical effort is 30 man-days.
- ➔ Elapsed time 1 month.
- ➔ Focus on delivering the basic portal with 2 reporting portlets.
- ➔ Use of tried and tested methodology.

Additional requirements and complexities can be added seamlessly in later phases without compromising the early benefits of the rapid implementation solution.

Consulting Services

These Quick-Win solutions are part of a portfolio of implementation services that leverage rapid implementation tools and methods designed to implement Oracle technology quickly and effectively. Based on **plus consultancy's** own custom methodology, these solutions were developed by experienced consultants who have worked with Oracle Business Intelligence and Data Warehousing tools since 1983.

The plus consultancy Difference

plus consultancy, based in Brighton, UK and with associate offices in Morristown, USA and Haarlem, the Netherlands, have been leaders in the Business Intelligence field since 1983.

plus consultancy's team of consultants have worked on Oracle Express implementations since the start of the company, and have unparalleled experience in Oracle-based OLAP and Data Warehousing solutions. As an Oracle Certified Solution Partner, and as Oracle's premier Business Intelligence partner in the UK and Ireland, no one is better placed to ensure your migration from Oracle Express to Oracle 9i OLAP goes smoothly.
